Ementa: A literatura científica sobre sustentabilidade exige cada vez mais uma "transformação em direção à sustentabilidade" como base para lidar com as atuais crises sociais e ecológicas. Estas crises contemporâneas são ao mesmo tempo convergentes e sobrepostas, exigindo abordagens trans e interdisciplinares. O objetivo desta disciplina é discutir as diversas abordagens relacionadas à transformação e à sustentabilidade através da mais recente literatura científica e da sua aplicabilidade na pesquisa empírica.
